PLAYBACK

RECALLED REALTIME

RECALLED PLAYBACK

Increasing deterioration in the TM is due to continuous decrease in the received SNR, as the S/C moves further away. Currently, 1024bps SNR over 70m antennas is below 1dB.

As a result of decreasing DSN coverage and consequent inability to playback older data still in the DSU, missing TM still prior to 140.17:23 SCET is no longer available for playback due to data dumping.
